AFRC Automated Line of Duty (ALOD)

Application Changes

Application Release Information

       Application: AFRC ALOD

       Release Number: 1.2.0

       Release Date: 8 November 2013

Introduction

This document contains the release notes for AFRC ALOD version 1.2.0. The following sections describe the release in detail and provide late-breaking or other information that supplements the main documentation. This is a maintenance release that includes some new features.

What's New?

- Issue 8 – When a case is complete, the system generates a PDF of the Form 348 and 261 (if applicable) and stores the PDF as a historical copy of the case

- Issue 25 – Updated P-Waiver workflow to use the correct email template to notify the member that the P-Waiver request has been approved.

- Issue 26 – Updated P-Waiver workflow to provide a return option to the RMU Med Tech.

- Issue 28 – Wing level users in the Reinvestigation Request workflow can now view all reinvestigation requests under their chain of command.

- Issue 29 – The tracking tab has been updated to display all comments that are entered in the RWOA comment box. This was previously being truncated at 200 characters.

- Issue 50 – Corrected special case search to return all reporting unit results to medical technician.

- Issue 127 – Added 508 statement and link from page footer

- Upgraded ABCpdf third party PDF generation library to the latest version (8.1.3) that runs on .NET 3.5.

- Updated DBSign third party application license.

- Resolved inconsistencies between code and database including one unreported error that was causing system errors to not be recorded in the database.
